Bunting Graphics, Inc. Architectural Excellence

Bunting Graphics, Inc. is a platinum level provider of signage and branded elements. The company client mix comprises a select group of brands that have high visibility and architectural grade standards.

Bunting Graphics is the largest manufacturer of architectural grade signage in North America with total plant capacity of 210,000 square feet in multiple locations.

Bunting operates its business from a position of financial strength with the ability to bond \$40 million aggregate and \$15 million single limit.

Architectural Facades

Architectural facades convey a company's brand and image in a tangible way. Bunting is experienced in designing, engineering, fabrication, and installation of facades providing our customers with a turnkey solution in utilizing building structures to extend the communication of brand.

Feature Facades:

- U.S. Coast Headquarters Facility, 56,000 sqft
- New Campus East, Ft. Belvoir, 76,000 sqft
- Mercy Medical Center, 36,000 sqft
- Williamsport Transportation Center, 7,600 sqft
- Chrysler Tower Program, 480 sqft
- PNC Bank, 4,264 sqft

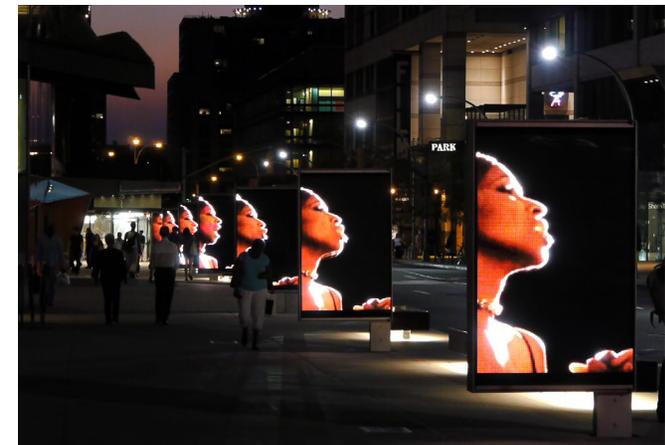

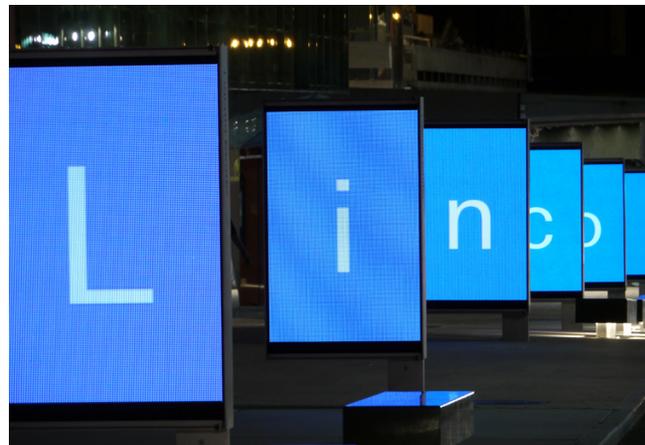

Solar & Digital Integration

Bunting was an early adopter of digital and solar technology. Today the digital market is exploding with growth. Savvy companies are recognizing that the digital technology can be integrated into branded kiosks, signage, and displays creating new touch points to their customers. Bunting's design engineering teams work with our clients to integrate this technology into their branded architectural elements.

Featured Solar & Digital:

- Lincoln Center
- Utah Valley University
- Princeton University
- Dallas Fort-Worth Transit
- Greater Richmond Transit
- First Niagara Bank
- Citizens Bank
- PNC Bank
- Children's Hospital of Pittsburgh

Signage & Wayfinding

Branding is how organizations communicate value in a tangible way. Signage is a primary means for increasing customer awareness of brand.

Bunting clients receive the benefits of an architectural fabricator offering commercial grade capacity. This means our clients enjoy the benefits of the highest quality appearance combined with the production output of a commercial grade fabrication facility.

Wayfinding is defined as the process in which a person navigates throughout a facility. Good wayfinding is highly correlated to a positive experience for the visitor. Bunting is able to program wayfinding for its clients and is sensitive to how wayfinding impacts the customer experience.

Featured Signage:

- MetLife Stadium
- Dallas Cowboys Stadium
- Indianapolis Colts Stadium
- St. Louis Cardinals Stadium
- Miami International Airport
- Charlotte Douglas International Airport
- BWI Airport
- George Bush International Airport
- City of Dallas Wayfinding
- City of Chicago CTA Wayfinding
- Ann & Robert H. Lurie Children's Hospital of Chicago
- Miami Memorial Hospital

Architectural Brand Features

Architectural features act as symbols intended to create an emotional experience within the environment. Unique fabrication talents combined with high attention to quality and detail sets Bunting Graphics apart.

Bunting's fabrication capabilities extend to branded features such as custom countertops, cabinets, sculpture, banners and all manner of graphics.

Featured Work:

- University of Pittsburgh
- City of Dallas
- U.S. Dept. of Justice
- Royal Caribbean Cruise Lines
- Children's Hospital of Pittsburgh
- U.S. Federal Courthouse, Buffalo

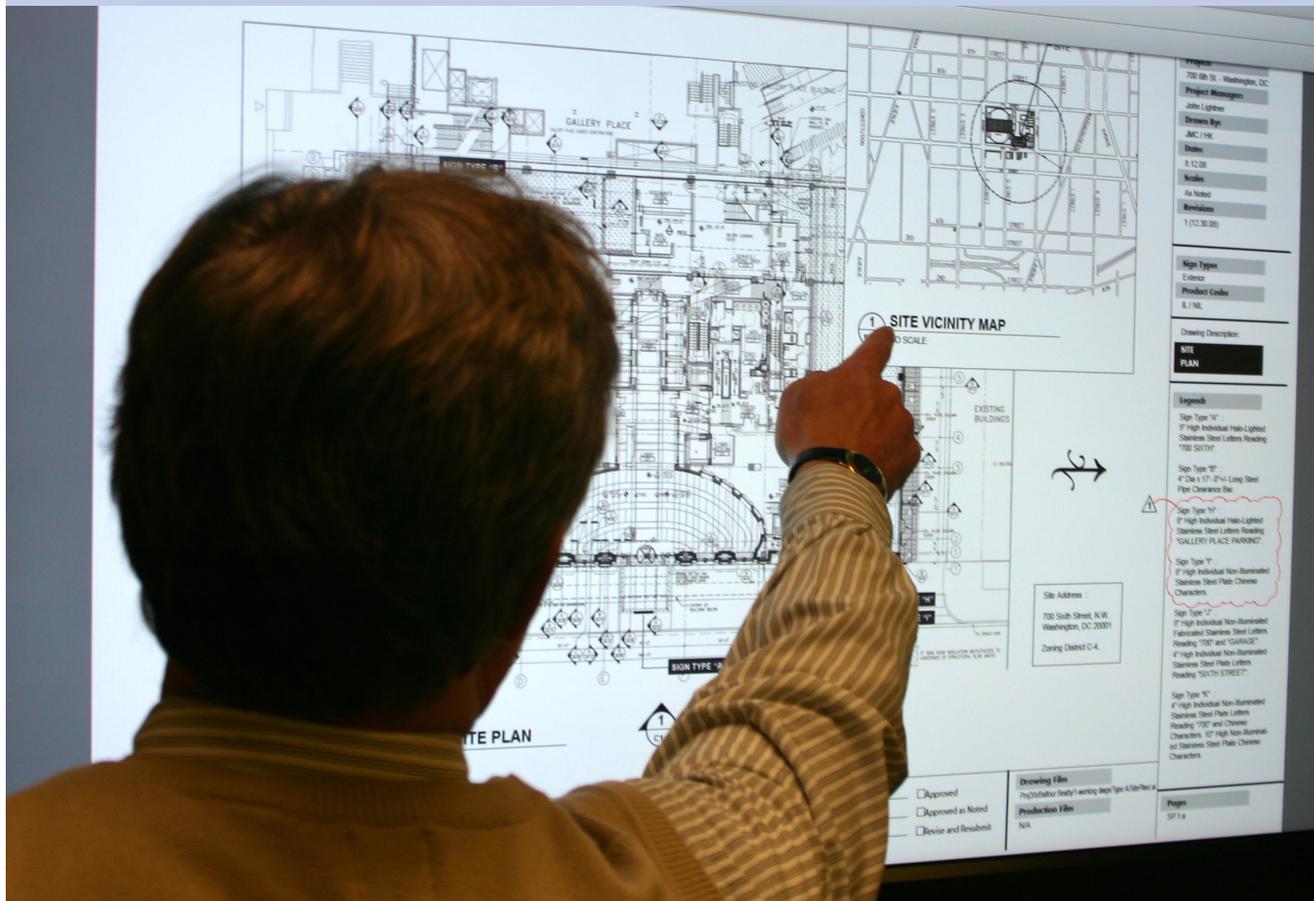

Doing Business with Bunting Graphics

Each client program requires its own unique process. These complexities require a project management team that is sensitive and adaptable to the client's needs. Bunting's processes and systems deliver flexibility while maintaining focused discipline.

With a full time staff of over 200 people, Bunting has the skill and expertise to overcome every obstacle and maintain project schedules without compromising quality of the end product.

Our team and our people hold fast to the value of treating our vendors and clients fairly in an open and honest exchange of communication.

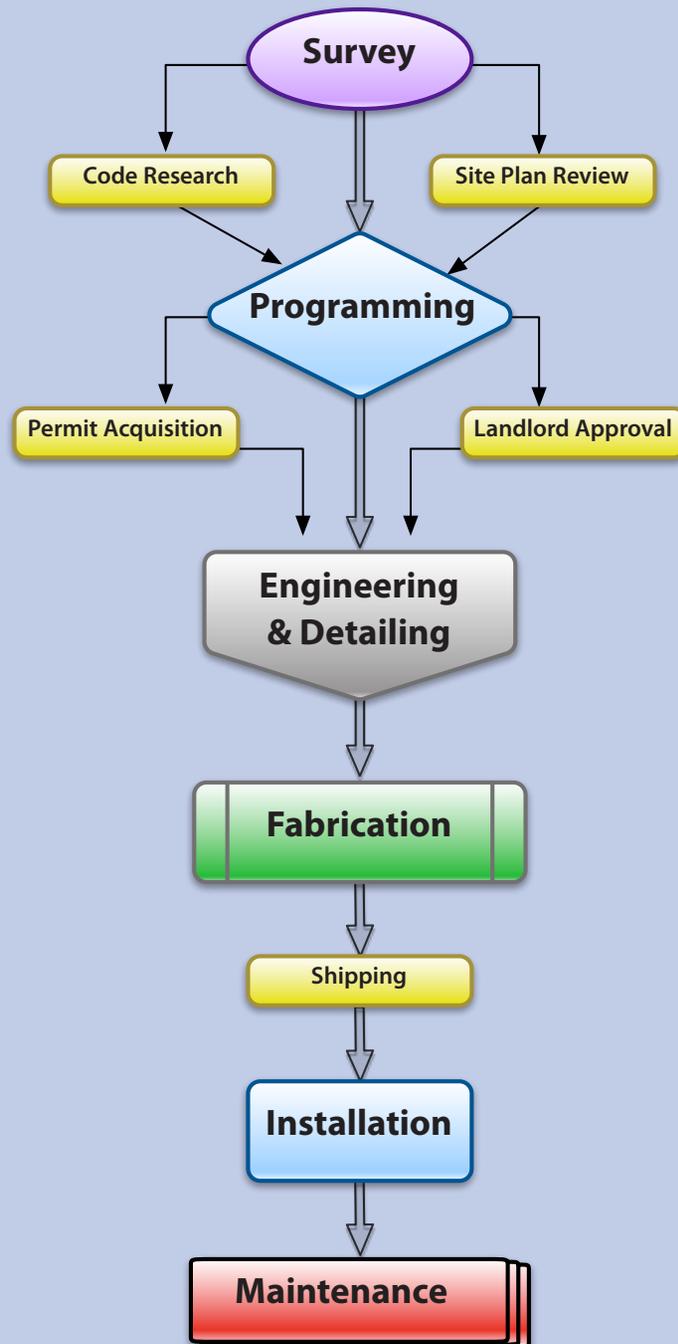

Project Workflow

Bunting follows a specific workflow process for completion of branding and re-imaging programs. Our project teams are led by a Senior Project Manager who is fully accountable to our clients with 24/7 availability.

Technical surveys, permitting, design engineering and fabrication are coordinated by project teams to achieve the targeted installation dates. We offer online reporting of project progress and also conform to our clients reporting requirements.

Our goal is to ensure brand consistency across multiple site locations with quality fabrication and meeting targeted completion dates.

Survey Phase

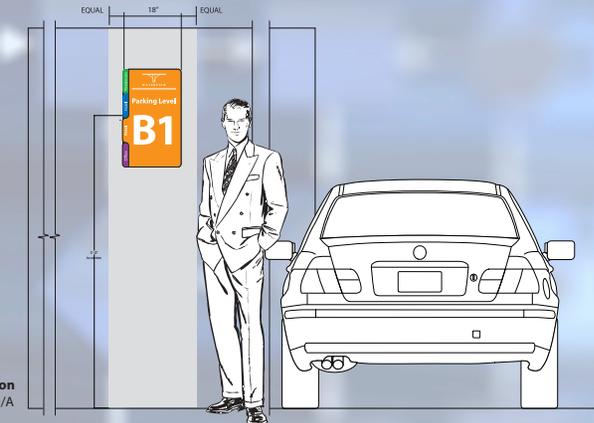

The survey phase is performed to determine the unique site conditions and to make signage recommendations for each location. This process can be handled by the client and their design team or by Bunting Graphics in accordance with the contract.

The survey information forms the basis of the scope of work for each site.

Programming Phase

Bunting works in conjunction with the client, design and team to ensure that the proper message is on each sign. Permits and approvals are addressed in this phase.

Bunting has developed systems which streamline the change of messages. This allows a brand program to have customization on the fly but still adhere to the brand standards.

Engineering Phase

The technical audit is used to verify the actual as-built conditions for all sign locations. Bunting offers a distinct advantage to our client at this phase. Our process allows for quick additions/changes to shop drawings to accommodate unexpected mounting conditions or other unique technical issues that may arrive.

Fabrication Phase

Bunting Graphics has 193,000 Sq. Ft of fabrication floor space available to our clients. We offer architectural quality with commercial capacity -- a distinct advantage in re-imaging or branding roll outs as we can handle large volumes of work and maintain a higher quality level of output.

During the fabrication stage our project team keeps our client informed with reporting. Our online client view allows our clients to view progress at each site and to receive automatic alerts in the event of a schedule delay.

Installation Phase

Installation at Bunting is self performed or outsourced to pre-approved vendors that are managed in the field with a Bunting superintendent. Each sign has a completion photo taken and is punch-listed by Bunting prior to turning over the project to the client.

It is the commitment to a consistent work flow process that allows Bunting to excel in the installation phase.

Maintenance Phase

The maintenance phase of the process is just as critical as the performance of work. The client needs to manage its risk and ensure that all parties have been paid. They also need to be able to provide facilities accurate maintenance documents and as-built drawings.

Our online reporting allows our client to view the sign assets at each location with related costs. This makes it easy to create depreciation schedules per location. In the event of maintenance or replacement needs, there is clear communication as to what needs to be addressed.

Bunting Graphics A Century of Success.

Bunting is a company large enough to perform and yet small enough to be agile, flexible, and results oriented at the top. Top executive level participation is the norm.

Bunting is solid financially with an excellent bonding rate which provides 3rd party assurance of financial strength.

The company's strength is based on a process which is comprehensive yet flexible enough to accommodate changes on the fly. Our team is accountable for every aspect of the process and we involve our client every step along the way. This means we manage expectations, identify and manage risks, stay focused on priorities and finish strong.
