Ann & Robert H. Lurie Children's Hospital of Chicago

Project Gallery

The Lurie Children's Hospital project involved the fabrication and installation of the interior wayfinding and signage package for the new hospital. There were more than 7000 signs on the project with 69 sign types including directories, room signs, code signs, specialty and directionals.

Detailed shop drawings were provided for all sign types along with a message schedule for each individual layout. There were a great number of sign materials used for the project including acrylic, digital prints, vinyl, aluminum, sign foam and tactile letters and rasters.
